

Step 1: Type python in chrome, after that click python.org

Step 2: Go to downloads and download the python 3.11.0 according to our lap 32 bit or 64 bit

The screenshot shows the Python.org website's download page. The browser's address bar displays `python.org/downloads/`. The page features the Python logo, a search bar, and a navigation menu with links to About, Downloads, Documentation, Community, Success Stories, News, and Events. The 'Downloads' menu is open, showing options like 'All releases', 'Source code', 'Windows', 'macOS', 'Other Platforms', 'License', and 'Alternative Implementations'. The 'Download for Windows' section highlights 'Python 3.11.0' and includes a note: 'Note that Python 3.9+ cannot be used on Windows 7 or earlier.' Below this, it states 'Not the OS you are looking for? Python can be used on many operating systems and environments. View the full list of downloads.' A yellow banner at the bottom promotes the 'Python Developers Survey 2022'. The Windows taskbar at the bottom shows the date as 11/5/2022 and the time as 4:10 PM.

## Step 3: Install that python 3.11.0 and install it completely

Step 4: After install, go to recently added files check the files  
ideal python, python 3. 64 bit, module dox are added

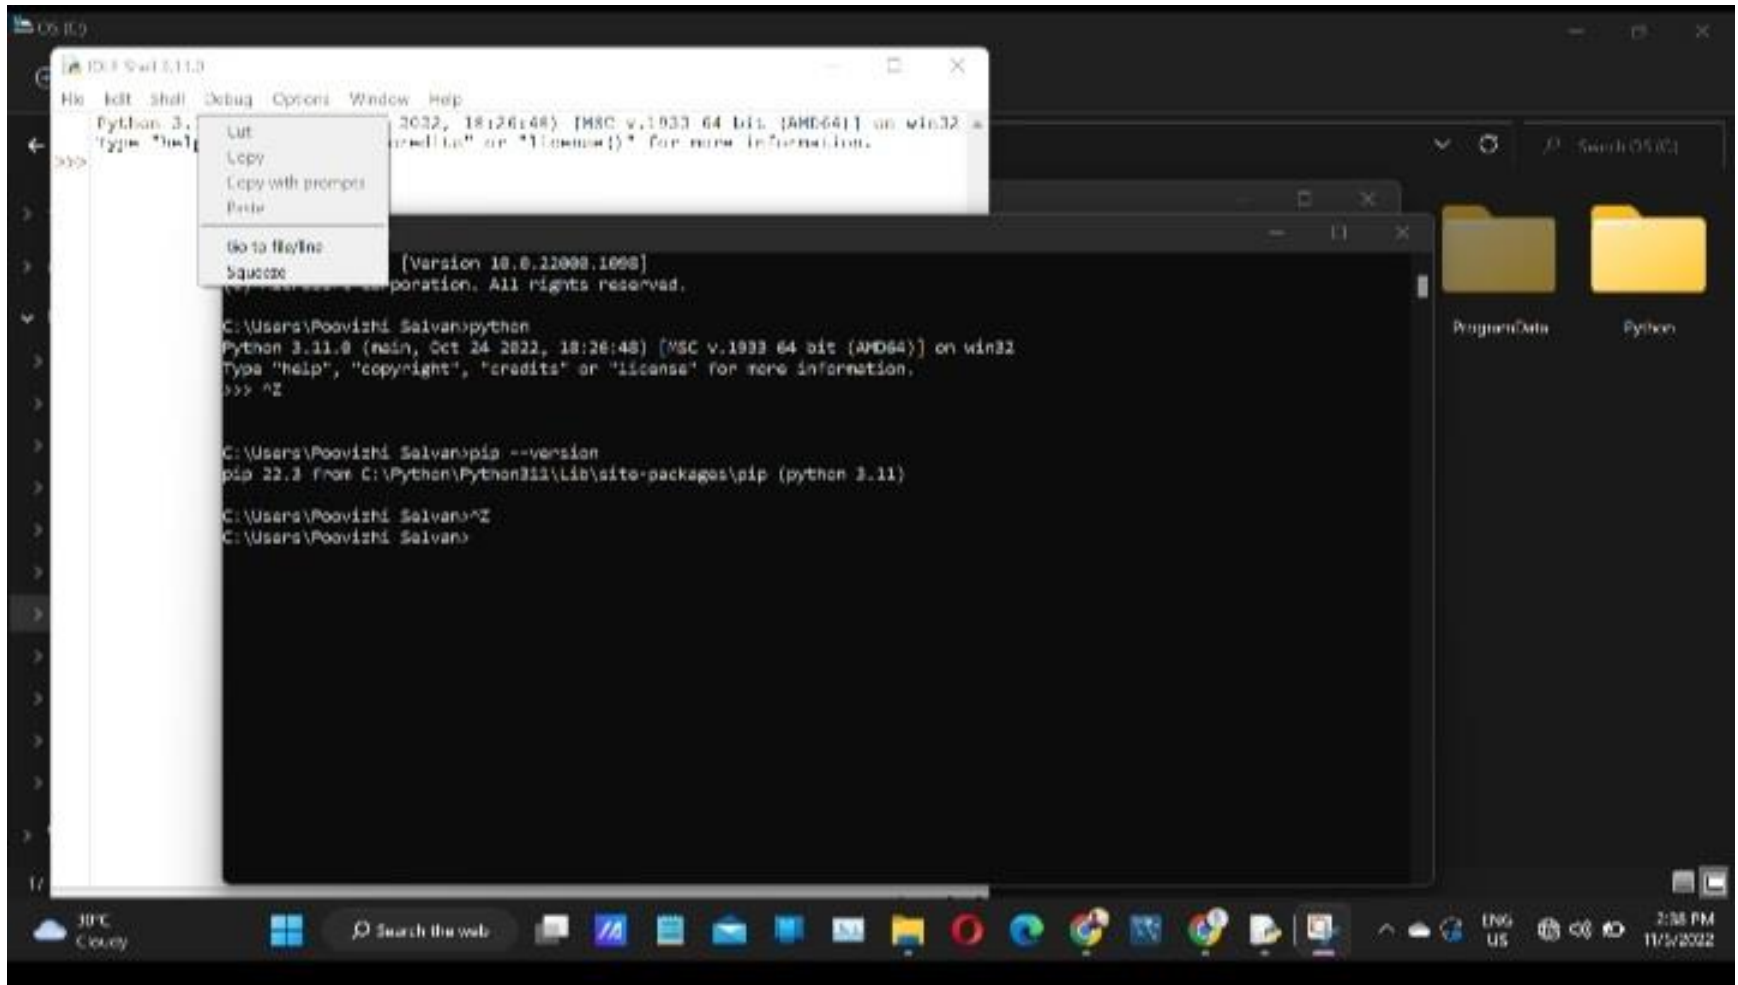

Step 5: Open python 3 64 bit, type “ Hello World” and print it, for checking the python 3 is working or not

The screenshot shows a Windows File Explorer window with a dark theme. The address bar displays 'Downloads'. The main pane shows a list of files and folders, including 'Python 3.11 (64-bit)', 'Python 3.11.8 (main, Oct 24 2022, 18:26:48) [MSC v.1933 64 bit (AMD64)] on win32', 'Type "help", "copyright", "credits" or "license()" for more information.', '>>> print("hello world")', 'hello world', and '>>> \_'. The taskbar at the bottom shows the Windows Start button, a search bar, and several application icons. The system tray in the bottom right corner displays the date and time as '4:12 PM 11/5/2022'.

```
Python 3.11 (64-bit)
Python 3.11.8 (main, Oct 24 2022, 18:26:48) [MSC v.1933 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license()" for more information.
>>> print("hello world")
hello world
>>> _
```

Step 6: You can check this in command prompt or in ideal shell

```
Python 3.11.0
Type "help()" for more information.
>>>

C:\Users\PooVizhi Salvan>python
Python 3.11.0 (main, Oct 24 2022, 18:26:48) [MSC v.1933 64 bit (AMD64)] on win32
Type "help()", "copyright()", "credits()" or "license()" for more information.
>>> ^Z

C:\Users\PooVizhi Salvan>pip --version
pip 22.3 from C:\Python\Python311\Lib\site-packages\pip (python 3.11)

C:\Users\PooVizhi Salvan>^Z
